**FOR IMMEDIATE RELEASE**

**HUBBELL POWER SYSTEMS, INC. ANNOUNCES REALIGNMENT OF DISTRIBUTION NETWORK**

August 21, 2017 (Centralia, MO) – Hubbell Power Systems, Inc. is proud to announce the realignment of its distribution network in the Northeast portion of the United States. In order to ensure customers continue to receive superior service, three CHANCE® and ATLAS Resistance® brand suppliers were repositioned, effective August 1, 2017.

1. **Earth Anchoring Suppliers LLC**, a growing distributor in the Northeast, has expanded its territory from Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York and New Jersey to include Delaware, the eastern portion of Pennsylvania, Maryland, and the District of Columbia.
2. **Intech Anchoring Systems**, a valued CHANCE brand distributor for more than 20 years, is expanding from Michigan, Ohio and eastern Indiana, into western New York, Pennsylvania and Maryland.
3. **Walder Foundation Products**, a trusted supplier in the southern two-thirds of Virginia for more than 25 years, is adding northern Virginia and the District of Columbia to its reach.

Hubbell Power Systems, Inc. offers dependable, engineering-based solutions for the residential, commercial, industrial and utility markets through its national distribution network in the United States, Canada and the Caribbean.

“We are confident that the realignment will ensure success through improved stocking locations, competitive pricing and proven installer training,” commented John Bliven, Business Unit Director, Civil and Construction Products. “We could not have found more qualified and committed distributors to support this area of our business, and we are excited about the future in this growing territory.”

**About Hubbell Power Systems, Inc.**

Hubbell Power Systems, Inc. (HPS) manufactures a wide variety of transmission, distribution, substation, OEM and telecommunications products used by utilities. In addition, HPS products are used in the civil construction, transportation, gas and water industries. Products include construction and switching products, tools, insulators, arresters, pole line hardware, cable accessories, test equipment, transformer bushings and polymer precast enclosures and equipment pads.
