## **RISING CTL|THOMPSON ENGINEER HONORED FOR ACHIEVEMENTS**

**(DENVER – Feb. 13, 2020)** [CTL|Thompson](#), a full-service geotechnical, structural, environmental and materials engineering firm, is proud to announce that its geotechnical engineer and associate Benny I. Lujan, P.E., was named a 40 Under 40 award winner for 2020 by the [Denver Business Journal](#) and a 2020 Top Young Professional by [Engineering News Record \(ENR\)](#) Mountain States.

The *Denver Business Journal* annually recognizes the accomplishments of young professionals (under 40) who stand out for their leadership, contributions and innovations within their organizations, their professions and their greater community.

*ENR* annually recognizes up-and-coming industry leaders under age 40 from across the Mountain States region. Honorees have demonstrated a mastery of new technologies and worked hard to mentor colleagues and others about better design and smart construction practices.

Lujan has provided leadership and engineering solutions for some of Denver's most visible projects. Recently, he co-designed a first-of-its-kind passive water management system for three 13-story buildings and a below-grade parking garage at the Colorado Rockies McGregor Square project. He was also an integral part of the team that designed and constructed a specialized shoring system and foundation for Denver's newest high-rise, 1144 Fifteenth Street.

"All of these projects have presented extraordinary challenges, which Benny was able to address through his exceptional engineering technical ability and vast project experience," said CTL|Thompson Vice President Marc Cleveland. "Benny is a high achiever who demonstrates ongoing performance and leadership both at our firm and within the community he serves. We recognize Benny as a future leader, and he is well-deserving of these awards."

Lujan joined CTL|Thompson in 2006 while still a student at Colorado School of Mines. Since then, he has authored more than 1,200 engineering reports and been the engineer of record on over 30 major

projects, including preliminary and design-level geologic and geotechnical investigations/consultations and post-construction geotechnical engineering consultations.

The American Council of Engineering Companies (ACEC) of Colorado and Civil + Structural Engineer Magazine also recognized Lujan's contributions in 2019, naming him [ACEC Young Professional of the Year](#) and a [Civil+Structural Engineer Rising Star](#), respectively.

**About CTL|Thompson**

[CTL|Thompson](#) is a full-service geotechnical, structural, environmental and materials engineering firm. Established in 1971, the firm employs 245 technical and nontechnical employees and provides expertise in small and large-scale projects in all areas of construction. CTL|Thompson is headquartered in Denver and has offices throughout Colorado in Fort Collins, Pueblo, Colorado Springs, Glenwood Springs and Summit County as well as in Cheyenne, Wyoming, and Bozeman, Montana.
