## GoliathTech makes the 2020 Entrepreneur.com Top Growth Franchises List

**31 October 2020 - [GoliathTech](#) has been awarded a spot on the [2020 Entrepreneur.com Top Growth Franchises List](#), ranking among the Top 150 North American businesses having demonstrated healthy and sustained growth as well as the ability to support their franchisees over the last 3 years.**

This prize goes to show that GoliathTech, just like the other businesses that have made the list, has its clients' best interests at heart. Even through a pandemic, they kept their promise to provide quality products and outstanding service.

"When growing a business, there is nothing more important than being able to look your customers in the face, shake their hands and see the success right in their eyes," explains Julian Reusing, GoliathTech's president. "This award makes us at GoliathTech proud of being amongst the top fastest growing franchise chains globally. It is a validation of our abilities to bring our customers, from a zero start, straight to the finish line, every time!"

In the construction industry, it's all about trust. GoliathTech is educating customers across the world to recognize how seriously they take their products' quality and their services. GoliathTech helical piles have now proven to be among the best solutions out there.

With investments in research and engineering, GoliathTech has been able to engineer a helical pile that meets the industry's unique standards while meeting both Canada and the United States' compliance codes. GoliathTech has revolutionized the standards for helical piles in terms of product material, composition, galvanization, and the ability to resist torsion, lateral movement and compression.

### About GoliathTech

For more than 15 years, GoliathTech has been combining strength and know-how to offer the best piling solution to support your project. Their helical piles are suitable for any type of installations, soils and do not cause any damage to terrain or structures.
